Information for the participant and Electronic informed consent form

Title of the study: Healthy [Brain] Ageing – a European online project to identify and longitudinally follow-up individuals at risk for neurodegenerative disorders, including Parkinson's disease

Study acronym: HeBA

Co-Sponsors of the study:

University of Luxembourg (UL)/Luxembourg Centre for Systems Biomedicine (LCSB)

Luxembourg Institute of Health (LIH)

Chief Scientific Investigator of the study: Prof. Dr. Rejko KRÜGER

Chief Medical Investigator of the study: Prof. Dr. Rejko KRÜGER

Contact details:

Professor for Clinical and Experimental Neuroscience, University of Luxembourg, Director of Transversal Translational Medicine, Luxembourg Institute of Health, and neurologist at Centre Hospitalier de Luxembourg

Phone number: +352 621 789 769 (during working hours: 8h-17h)

E-mail address: heba@uni.lu

1 SECONDARY USE OF YOUR DATA

You have agreed to donate your data to help researchers meet the objectives of the Healthy Brain Ageing (HeBA) study. Thank you very much for agreeing to do this.

The details of this study are explained in the main ethical consent form. These include how your data will be used in the context of this study - this is called its *primary use*. Primary use refers to the fact that your data will be used for the purposes of the *primary* (main) study only.

The purpose of this document is to explain the possible *reuse* of your data, for another research project in the same field of the HeBA study. This is called a *secondary use* of your data.

With this document, we are asking if you agree to the reuse (secondary use) of your data (with the exception of your direct identifying information) for future research in the field of neurodegenerative diseases.

As a reminder, giving your consent is entirely voluntary. You can choose not to allow the secondary use of your data without this affecting your participation in the HeBA study. Likewise, if you agree to the reuse of your data, you may withdraw your consent at any time without having to give a reason.

If you give your consent, the UL/LCSB and LIH may make your data available for use in other research and development programmes in the field of neurodegenerative diseases. These programmes may be carried out by the same institution and/or by other national or international organisations – but only according to the choices you make in the consent form that follows.

These choices depend on the consent options you select. These options are presented at the end of this document and differentiate secondary uses according to:

- whether or not the investigator remains the same,
- whether or not the data is shared within the European Union (EU).

It should be noted that these secondary uses will in no case result in the marketing of your data.

The principles described in the primary HeBA study documents will also apply to these future studies. Please read carefully the points described below.

1.1 Your data: Processing and Rights

Your data will be protected according to the Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data - the General Data Protection Regulation (GDPR) - and any other local legislation supplementing this text, in this case the Luxembourg law of 1 August 2018 on data protection from.

You therefore have a right of access and rectification of your personal data. Under the conditions set by law and as described in the data protection notice provided to you, you also have the right to oppose the way your data is used, to request the erasure of your data, to request the restriction of certain aspects of the processing of your data, and to retrieve your data so that you can send it to a third party (right to data portability). If you wish to exercise your rights, you may contact your Chief Scientific Investigator.

For any requests for information regarding the processing of your data by the UL/LCSB and LIH, you can contact the UL data protection officer by email at dpo@uni.lu.

Finally, if you believe that the processing of your data constitutes a breach of the General Data Protection Regulation, you can lodge a complaint with the Luxembourg National Commission for Data Protection (CNPD).

1.2 Your data: Retention period

Your data will be retained, in compliance with legal provisions, for a period of 10 years from the end of the study, scheduled for July 2030. During this period, your data will be pseudonymised when they are used for research; this means that a code replacing your first name and last name will be used. After these 10 years, your personal data will be destroyed. Any additional data we produce from the analysis of your data will be stored in anonymised form, in compliance with legal provisions, for a period of 25 years from the end of the study. Any extension of this retention period will be subject to a request for a favourable opinion to CNER.

1.3 Your data: Transfer outside Europe

If you agree, your data may be transferred for reuse for research purposes outside the European Union (EU). Only data that cannot be used to directly identify you (coded or pseudonymised data) will be shared outside the EU.

In some cases, the countries receiving your data may have less strict data protection laws than those in the EU or European Economic Area. If that is the case, the UL/LCSB and LIH will take appropriate measures to protect your personal data, always in line with your explicit consent.

1.4 Withdrawal of consent

As explained above, you may withdraw your consent at any time without giving a reason. However, it is important to note that the withdrawal of consent for secondary use only applies to data that have not yet been reused.

If your data have already been shared and/or reused, we may not be able to withdraw them, as doing so could compromise the progress and objectives of those new research projects. In such cases, withdrawal would therefore be refused.

Also, some of your data may already have been shared and/or reused in anonymised form (after erasure of the code assigned to you in the study) or pooled form (combined with data from other study participants). In these cases, it is no longer be possible link these data back to you.

Information on secondary uses

You may be informed of the secondary use projects in the context of the HeBA study. Communication will be made on the website www.heba.lu and via periodic newsletters.

Electronic informed consent form for secondary use

- I declare that I have read and understood the information provided in this document.
- I have had enough time to consider the secondary use of my data and discuss it with a person of my choice, such as my general practitioner or a family member. I have had the opportunity to ask all questions that have occurred to me related to the secondary use of my data, and I have received satisfactory responses.
- I am aware that the sharing of my data for secondary use is entirely voluntary and that I am free to withdraw my consent at any time without giving a reason for my decision and without being held liable for any damages. I only need to inform Chief Scientific Investigator or Data Protection Officer of my decision.
- I accept that the results from studies making secondary use of my data may be disclosed and reported in scientific publications. The way in which these results are presented will in no way enable me to be identified, either directly or indirectly.
- As described in the information document on the processing of my personal data as part of this study, I understand that any personal information gathered in relation to this study will be treated as strictly confidential, in accordance with the General Data Protection Regulation (EU) 2016/679 of 27 April 2016 (known as the GDPR) and all subsequent texts replacing or supplementing this Regulation (in particular, Luxembourg's law of 1 August 2018 on the organization of its National Commission for Data Protection and the implementation of the GDPR).
- I have a copy of the present document, together with the information document explaining how my personal data will be processed as part of this study. I understand that I have the possibility to download a copy of the present document from the study website.

	YES	NO
1. I willingly agree to the reuse of my pseudonymised data in projects in the same research area (neurodegenerative diseases) by **the <u>same</u> investigator and research institution.**	☐	☐
1.1. My choice expressed above remains valid if the secondary use project involves the transfer of my data outside the European Union.	☐	☐
2. I willingly agree to the reuse of my pseudonymised data in projects in the same research area (neurodegenerative diseases) by **a <u>different</u> investigator and research institution.**	☐	☐
2.1. My choice expressed above remains valid if the secondary use project involves the transfer of my data outside the European Union.	☐	☐
